Dear Families:

After twenty-five years of caring for children and families in our community, Dr. Horace Long will be retiring from active practice at the end of January 2026. Dr. Long has been an extraordinary physician, mentor and friend, not only to our team, but to generations of patients who have grown up under his care. His dedication, compassion, and commitment to Fayetteville families have made him a beloved part of our community and a pillar of Fayetteville Children's Clinic.

While we are sad to see Dr. Long retire, we are excited for him as he begins this next chapter surrounded by family and enjoying well-earned time for rest and new adventures.

Our clinic will continue to provide the same high-quality, family centered care that you have come to expect. Dr. Long's patients are warmly invited to remain with Fayetteville Children's Clinic and may choose to continue care with one of our other providers: Dr. Kelly, Dr. Iskander or Dr. Johnson.

For patients who currently have appointments scheduled with Dr. Long after his retirement date, our staff will contact you to reschedule with one of our other physicians in a timely manner to ensure continuity of care. Our team is also happy to assist with scheduling future appointments or helping you select the doctor who best fits your family's needs.

On behalf of the entire Fayetteville Children's Clinic team, we thank Dr. Long for his years of devoted service and the lasting impact he has made on our patients, staff, and community. He will always be part of our clinic family.

With heartfelt appreciation and warm regards,

Fayetteville Children's Clinic
